CORAL ADOPTION PROGRAM

Beneath the shimmering waters that surround the island of Kandima in Dhaalu Atoll region, a fragile world quietly rebuilds itself. Coral reefs, the most diverse type of marine habitat, protect the pristine beaches at Kandima Maldives and guard the islands' crystal-clear lagoon. They also support an astounding array of tropical fish, crustaceans and bizarre-looking molluscs, however for all of its beauty and apparent resilience, coral is a sensitive organism, vulnerable to extreme weather and sudden environmental changes.

Sponsor a frame, participate in reef creation and contribute to the ongoing conservation effort by adopting a coral frame. Take part in the Coral Adoption Program by transplanting coral onto your frame with the help of our resident Marine Biologist in the shallow waters of the lagoon. Three different frame sizes are available for adoption:

- Small \$60
- Medium \$80
- Large \$120

COMPLIMENTARY BIO PRESENTATION

Every Friday at 7:00 pm our marine biologist will share with you the wonders of the Maldives.

Enjoy a relaxing pre-dinner drink while you learn what coral really is, how the Maldives were formed and how long a turtle can hold its breath..

RENT A BIOLOGIST

We have a resident Marine Biologist, who is also an Experienced PADI Instructor, poised and ready to help you to learn more about the underwater world. Learn to identify some of the fish and coral species of the Maldives by going on fish-spotting and coral-spotting dives.

Take the marine biologist as a private guide on your snorkeling, diving or dolphin trip to discover more of the secrets of the amazing liquid world.
